

# Project 1: ID3 with Imperfect Decision Trees

## Instructions

1. To begin, you need two files (and, of course, project1.py): `partition-input.txt`  
`dataset.txt`

2. Run the program by typing in the command line/terminal:

*Windows*

```
python project1.py <dataset file> <input partition file> <output partition file>
```

*Linux*

```
python3 project1.py <dataset file> <input partition file> <output partition file>
```
